Overview

Malwarebytes is known globally for our comprehensive and thorough remediation capabilities. More than 60,000 businesses globally have standardized on Malwarebytes protection and remediation solutions. This site license guide provides an overview of the Malwarebytes Incident Response Site License offering.

Malwarebytes Incident Response

Malwarebytes Incident Response is our cloud-managed advanced threat detection and remediation platform that enables businesses to completely remove cyberthreats from their managed endpoints. Powered by our proprietary Linking Engine technology, thorough remediation capabilities can be automated and integrated with your existing infrastructure. Malwarebytes Incident Response streamlines the incident response process on corporate endpoints, minimizing malware dwell time and the need to reimaged.

Introducing the Malwarebytes Incident Response Site License

The Malwarebytes Incident Response Site License offers the best value to growing organizations while making endpoint security easy to manage.

- Number of licenses are based on the number of employees in the organization
- Customers in any given tier pay the same price for that tier
- Site license includes telephone, email, and chat technical support—direct from our Malwarebytes support team

KEY BENEFITS

Enterprise wide coverage:
Deploy Malwarebytes remediation technology across your company that can easily accommodate your team as your company grows

Flexible deployment
Malwarebytes Incident Response includes persistent and non-persistent agents, providing flexible deployment options for your IT environment and existing infrastructure

Ease of use
Ability to pre-deploy Malwarebytes Incident Response on your endpoints so they can be scanned and remediated at the click of a button
