Basic security system too weak to protect against viral attacks on its own

Challenges

- **Conventional antivirus solutions** were not protecting against ransomware, APTs, and multi-stage malware attacks
- **Decentralized system** made it hard for the company to deploy additional protection
- **Traditional systems** were not able to address attacks in a timely and efficient manner

Reasons for Choosing Malwarebytes

- **Smooth integration**: Malwarebytes works seamlessly with the Agthia’s existing infrastructure, making its implementation a smooth process.
- **Cost effective**: Malwarebytes’ pricing worked within the company’s budget while also delivering quality protection.
- **Increased visibility**: The Malwarebytes Management Console provides the team instant visibility into endpoints to make sure they are protected, regardless of location.

How Malwarebytes Solved the Problem

- **Visibility** into endpoints for monitoring malware and other threats
- **Saves time** with built-in remediation and notifications
- **Reduces threat** of ransomware and malware
- **Quick customer service** helps resolve issues in a timely manner
Malwarebytes Endpoint Security gave us the additional protection we were seeking with remediation capabilities that save time and increase effectiveness.

Mr. Zeeshan Khalid, Group IT/Information Security Manager,
Agthia Group
