CASE STUDY

“Malwarebytes gives our teams time to focus on strategic priorities.”

Challenges

- Symantec antivirus was missing instances of malware
- IT administrators were receiving a lot of calls about unusual system behaviors
- Resources were not being used productively

Reasons for Choosing Malwarebytes

- Effective protection: “We have not had a single infection since installing Malwarebytes.”
- Easy integration: Malwarebytes meets the school’s requirements, including its ability to function alongside other AV solutions.
- Dual functionality: Malwarebytes can be deployed on both servers and virtual machines
- Silent rollout: Malwarebytes deployment is so discreet that it doesn’t disrupt users’ routines

How Malwarebytes Solved the Problem

- Visibility and protection of remote endpoints when they’re off the network.
- Minimized malware infections
- Freed IT support teams for other tasks and priorities by eliminating time spent on re-imaging machines due to malware
- Automated malware cleanup
Since deploying Malwarebytes, we’ve seen a dramatic reduction in malware infections. Malwarebytes gives our teams time to focus their efforts on other strategic priorities.
