CASE STUDY

Constant remediation taking time away from valuable IT work

**Challenges**

- **Increasing attack surface** due to company growth
- **Days were spent** cleaning or rebuilding infected PCs
- **Remediation stole time** away from in-office and remote users
- **Cyberthreats** frequently re-infected systems

**Reasons for Choosing Malwarebytes**

- **Sustainable protection**: Malwarebytes provides behavioral-based threat analysis, instead of signature-based, like many other companies.
- **Small footprint**: Malwarebytes works in the background and doesn’t get in the way of productivity.
- **Time saver**: Better protection means more time given back to the IT teams.
- **Real time alerts**: Email alerts allow IT teams to immediately isolate and troubleshoot a specific device.

**How Malwarebytes Solved the Problem**

- **Eliminates** ransomware incidents
- **Stops threats** during new acquisitions
- **Saves thousands of hours** of valuable IT staff time globally
- **Endpoint coverage visibility** further reduces operational risks
“

The difference with Malwarebytes was night and day. It quickly dealt with new types of threats. It’s our defacto standard now.
