Malwarebytes OneView and ConnectWise

Fully leverage Malwarebytes best-in-class endpoint security and management functionality—directly from your ConnectWise tools. The ConnectWise integration lets MSPs easily manage Malwarebytes endpoint protection, billing, customer management, and other work streams all from within the ConnectWise platform.

Hosted integration, no code for MSPs to maintain

Increases ROI of your ConnectWise investment

Streamlines your endpoint security program

ConnectWise Automate®

Reduces manual effort and enhances productivity
Detect and provision endpoints, manage sites, and sync customer data with minimal hands-on work.

Automates security scans and remediation
Configure scan and threat removal automations from the ConnectWise Automate console.

ConnectWise Manage®

Streamlines customer billing and license management
Sync license and billing information within ConnectWise Manage to simplify customer management.

Automates support ticket workflows
Initiate ticket workflows from endpoint scans to give your team a head-start on addressing new security issues.
